

# Greenstone Enterprise

At Greenstone, we provide software and services that enable our clients to advance their sustainability strategies and become responsible businesses.

We deliver this through our award-winning software, our externally recognised best-of-class customer service and our brand promise 'data that talks to you'.

We go the extra mile, in both our software and client support, to ensure our clients achieve their sustainability goals.

## Our Enterprise software

Greenstone's Enterprise Software-as-a-Service (SaaS) solution enables organisations to collect, manage, analyse and report the data required to monitor and disclose sustainability performance with accuracy and confidence.

The easy-to-use, secure platform has Environment, Frameworks and Health & Safety modules to provide organisations with a complete picture of their sustainability performance, better quality data, and increased confidence in their reporting. Provided as a web based solution, it's quick to setup, with no capex requirement.

### Environment

- GHG reporting
- Scope 1, 2 & 3 analysis
- Target setting
- Initiatives performance
- Data validation tools

### Frameworks

- Company specific metrics
- Questionnaire builder
- KPI analysis
- Framework mapping
- GRI & CDP certified content

### Health & Safety

- Custom H&S metrics
- KPI analysis
- Incident reporting
- Action management
- Alignment with OSHA & RIDDOR

Our partnership with Greenstone has enabled us to improve data accuracy and has increased confidence in our reporting to help us accurately report our achievement against our targets, both now and in the future."

# Enterprise – enabling responsible business

## Key benefits

- Centralised data management for ongoing performance management and external disclosure
- Improves efficiency of data collection, transparency and engagement
- Enables a long term data strategy for better reporting
- Meet multiple internal and external stakeholder reporting requirements
- Track and monitor progress against targets and KPIs

## Key features

- Flexible system evolves with clients as their reporting requirements change
- Aligned with frameworks such as CDP, GRI, DJSI, SDGs, TCFD, SASB and UN Global Compact
- Multiple data entry options including automation
- Unlimited number of users at no extra cost
- Intuitive and easy to use

## Data that talks to you

At Greenstone, our commitment to our clients is 'data that talks to you' and we make it central to everything we do – both in the way we develop our software and the way we support our clients:

- **We invest in our software** to guarantee usability, applicability and relevance, to ensure that our clients get the answers and information they need from their data.
- **We partner with our clients** to constantly develop and innovate to fit with their evolving requirements, both now and in the future.
- **We provide uncapped support** from our dedicated team of industry-experts, to ensure our clients have access to best practice advice.
